

# LIQUID CONTROLS

Simply the Best™

**Application-driven  
Flow Metering Solutions**

## Performance so dependable, you should ask for it by name

All day. Every day. Whether you're delivering fuel oil or liquid propane gas, or metering industrial products, an inaccurate meter can create unnecessary but avoidable costs. That's why you need the sustainable precision of Liquid Controls' metering solutions now.

### Liquid Controls offers you accuracy

From its design inception to the installation of Liquid Controls' equipment on your vehicle or at your plant, you can be assured that you're getting the metering system with the greatest attention to accuracy, second to none.

### Liquid Controls offers you long service life

Because of the unique way they're designed and built, Liquid Controls' products will deliver longer service life than other meter equipment. And that means your operation will be up and running longer, with less down time between repairs. When production hours count, that's money in the bank.

### Liquid Controls offers you lower lifetime cost than any other flow metering system available

Planned obsolescence has no part in the engineering behind Liquid Controls' equipment. You can expect many years of consistent, accurate performance. It all adds up to less cost and more profitability for your company. We take pride in that.

### Liquid Controls offers you the highest quality standards

You can count on quality when you deal with Liquid Controls. Our state-of-the-art manufacturing facility is ISO-certified, and our meters are Weights and Measures approved for custody transfer by the U.S. government National Institute for Standards and Technology (NIST), as well as by other international agencies. Accuracy, dependability and service are the cornerstones of our products and our business... and of our commitment to our customers worldwide.

Your unique fluid handling challenges may involve extreme viscosity, temperature, pressure, accuracy requirements, or all of these and more. Liquid Controls' metering solutions bring you proven performance that meets these challenges and delivers unrivaled accuracy and long service life.

## Products

Positive displacement meters

---

Electronic registers

---

Electromagnetic meters

---

Turbine meters

---

Coriolis mass meters

## Applications

Trucks

---

Fleet fueling

---

Load racks/gantries (truck and railcar)

---

Pipeline

---

Refinery

---

Terminal (barge and tanker)

---

Industrial process

---

Municipal water and waste water

## Industries

Refined petroleum products  
(heating oil, motor oil, gasoline, diesel)

---

Aviation fuels

---

LPG

---

Asphalt/asphalt emulsions

---

Agricultural chemicals

---

Paints and coatings

---

Pulp and paper

---

Food and beverage

---

Chemical processing

---

General industrial

## A tradition of excellence that benefits you

Once you install a Liquid Controls product, you probably won't be thinking about the history of the company that made it for you. You won't be wondering how our reputation for excellence was earned. You'll care that it works. And it will work, precisely and reliably for years to come.

Almost fifty years ago, Liquid Controls set a new standard of excellence in engineering and building the finest flow meter products possible, starting with metering aviation fuel for the United States Air Force.

Since that time, the industry base we serve has grown, broadened. Our product line has expanded to include a wide variety of flow meters, accessories and related items distributed worldwide. But our commitment to excellence will never change. The professionals at Liquid Controls are driven to bring you products that perform efficiently and accurately, with minimum maintenance for years to come. Delivering everything you'd expect from the very best—that's our goal.

### A good fit

In 2001, Liquid Controls joined the IDEX team of companies. IDEX is a leader in the manufacture of a broad range of pump products, dispensing equipment and other engineered technologies. Maintaining a theme of leadership, IDEX delivers Innovation, Diversity and **EX**cellence to thousands of valued customers around the world.
