TECHNOLOGIES

Wright Flow Technologies TRA[®] 500 Series Sanitary Centrifugal Pumps

Simply A Better Value than Fristam[®]

WrightFlow Technologies (WFT) TRA[®] 500 series sanitary centrifugal pumps are “drop-in” replacements for Fristam FP, FPX and FPR series pumps on a model-to-model basis, with all piping connections and centerline distances the same, port to port, allowing easy replacement without piping or mounting changes. But WFT offer standard features and benefits either not available from Fristam, or only available at extra cost. Similarly, Wright Flow Technologies offers wear part interchangeability, guaranteed to interchange with materials and tolerances as tight or tighter than the original parts. This means you can realize many of the benefits of WFT by upgrading to Wright Flow Technologies replacement parts. Let's compare features:

Features	Why is it important?	Availability	
		Wright Flow Technologies	Fristam®
Integral inlet/outlet in housing	Maintenance can be performed without having to disconnect suction piping. Back pull-out	Standard on all sizes	Not available Suction in cover Discharge in Housing
No-weld inlet/outlet clamp connections	Standard clamp connections for suction and discharge are "machined-in" no welding to become a corrosion source	Standard on all sizes through TRA 506	Not available
Stainless steel flange adapters	Stainless steel increases the corrosion resistance of the pump	Standard on all models	Available at extra cost - painted cast Iron standard
Polished exterior surfaces	Exterior pump surfaces are polished for cleanliness - no "as cast" rough surfaces to become contaminated.	Standard on all models	Available at extra cost "as cast" standard
One size seal fits all up Through 30 HP (22 kW)	Robust 30 millimeter internal mechanical seal minimizes shaft deflection and seal wear	Standard on all models through 30 HP (22 kW)	Available at extra cost
Change from single to double seal simplicity	Changing from single to double seal is simple and inexpensive - no need to change shafts. flange adapters and motors	Standard on all sizes	Available at extra cost
